

Voice input command list for voice recognition learning

When reading out, the following points must be observed:

- Read out the numbers one at a time correctly and naturally.

(For example, “1234” must be read out “one, two, three, four”, not “twelve, thirty four”.)

- “#” Must be read out “Pound”.
- “*” Must be read out “Star”.
- Do not read out parentheses. “ (” and hyphens “-” are used for separating numbers in a phone number.

Ex.

“ (888) 555-1212” must be called out “Eight, eight, eight, five, five, five, one, two, one, two.”
